Parametric Insurance · Real-Time AI · Zero-Touch Claims

PROBLEM

Gig Workers Have No Safety Net

Unpredictable income loss

No consistent earnings guarantee

Environmental disruptions

Rain · Traffic · Poor AQI

No existing protection

Traditional insurance doesn't cover daily wages

No system today protects daily wage loss in real-time

$500B+ gig economy underprotected

SOLUTION

GigShield = Real-Time Parametric Insurance

Detects disruptions automatically

Weather, AQI, Traffic — no manual input

Calculates income loss instantly

Converts environment → delivery efficiency → loss

Triggers payouts with zero manual claims

Fully automated from detection to credit

👉 **Fully automated protection system**

INNOVATION

We Don't Just Predict Risk. We Map It.

What sets our AI apart:

- Explainable AI — not black-box ML
- Converts environment → efficiency → income loss
- Every payout decision is traceable & auditable
- Hyper-local, real-time intelligence

Explainable AI = Trust at Scale

HOW IT WORKS

Fully Automated Pipeline

1. Weather + AQI + Traffic

2. Disruption Model

3. Delivery Efficiency ↓

4. Income Loss Calculation

5. Risk Score + Triggers

6. Auto Claim + Payout

FEATURES

Six Pillars of GigShield

Dynamic Weekly Premium

Risk-adaptive pricing aligned to gig income cycles

Hyper-Local Analysis

Street-level disruption detection

Predictive Risk

Next-few-hours income risk forecasting

Parametric Triggers

Automated thresholds — no manual filing

Fraud Detection

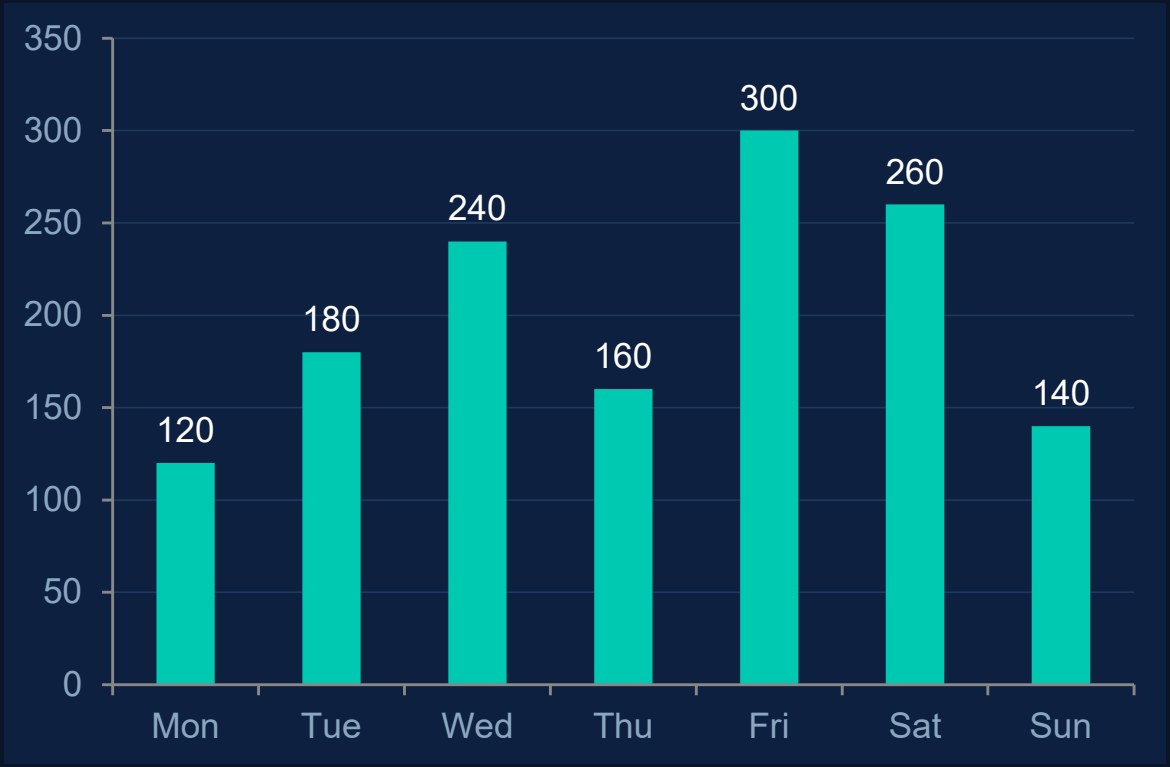
Behavior, location & duplicate checks

Zero-Touch Claims

End-to-end automation from event to payout

PREMIUM MODEL

Weekly Premium Adapts to Risk



How it's calculated:

- Based on real-time risk score
- Reflects income patterns
- High-risk periods → higher premium
- Low-risk periods → lower premium
- Matches gig workers' weekly cycle

CLAIMS

Zero-Touch Automated Claims

1. Income Drop Detected
2. Active Disruption Verified
3. Claim Auto-Triggered
4. Fraud Checks (instant)
5. Payout Credited

No Manual Filing. Ever.

The system detects, verifies, and pays — automatically.

FRAUD PREVENTION

Trust Is Built In

Location Validation

Confirms worker was in the affected zone

Environmental Verification

Cross-checks weather, AQI, traffic data

Behavior Analysis

Flags anomalous claim patterns

Duplicate Detection

Prevents repeat or double claims

👉 **Ensures trust + system integrity**

BLOCKCHAIN

NBFLite — Transparent & Tamper-Proof

Policy Storage

Immutable insurance records

Claim Records

Every claim logged on-chain

Payout Logs

Full audit trail for every disbursement

Transparent · Tamper-Proof · Auditable by anyone

PRODUCT

Built for Gig Workers

Mobile-First App

Designed for on-the-go workers

Real-Time Risk Dashboard

Live risk score + disruption map

AI Engine Visualizer

Transparent model insights

Seamless Onboarding

Connect gig account in minutes

DIFFERENTIATORS

Why GigShield Stands Out

01

Explainable AI

Not a black-box — every decision is traceable

02

Direct Income Impact Mapping

We calculate exact rupee loss, not probability

03

Fully Automated Insurance Flow

From disruption to payout — zero human intervention

04

Real-Time + Hyper-Local

Street-level, minute-by-minute intelligence

No competitor combines all four.

GigShield is the only fully-automated parametric gig insurer.

DEMO

How a User Experiences GigShield

1. User logs in
2. Connects gig account
3. Risk calculated live
4. Premium generated
5. Policy activated
6. Disruption occurs
7. Claim auto-triggered
8. Payout credited 💸

VISION

To build a real-time financial safety net for millions of gig workers globally

Protecting the world's 1.1 billion gig workers — one payout at a time.

GigShield

transforms uncertainty into protection.
